Mini ScareCrow

A U T O M A T I C P E T D E T E R R E N T

A short burst of air and a warning sound are activated by a motion sensor, keeping your pets from causing harm or getting hurt.

The Mini Scarecrow safely and humanely protects your covered porch or patio, potted plants, or countertops. A motion sensor activates a warning sound and a brief, harmless spray of compressed air to keep your pet away. Once your pet learns to recognize the warning sound, you can switch to "sound only" mode to conserve compressed air. The motion sensor and spray are separately adjustable so they can be positioned precisely.

Mini ScareCrow

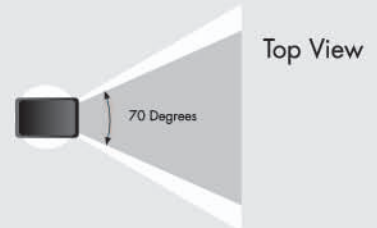

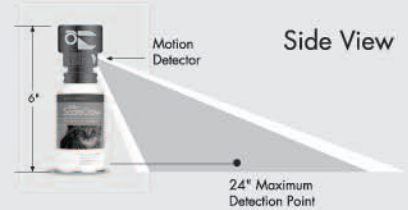

AUTOMATIC PET DETERRENT

A short burst of air and a warning sound are activated by a motion sensor, keeping your pets from causing harm or getting hurt.

- Quickly, effectively and humanely helps to teach your pet what they should stay away from and where they shouldn't go
- Sensor detects motion up to 1 meter (1 yard) away and activates spray
- Sprays compressed air - odorless, harmless, stainless
- Each can holds over 200 sprays
- Adjustable detection angle and spray angle
